METRIC PIPE

Uppercross Enterprises Ltd

The **ULTIMATE UNIVERSAL** Fitting

Agriflow compression pipe fittings are manufactured to the highest quality standards and are designed to enable the seamless flow, transfer and movement of water across various applications such as agricultural, plumbing and irrigation systems.

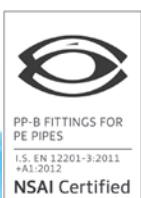

As a solutions provider Agriflow fittings are used to connect different pipe types and diameters for various water systems and applications facilitating optimum flow and movement of water efficiently and easily. Durable and versatile Agriflow fittings are suitable for working pressures up to 16 bar and for **potable water applications**.

Advanced design features such as **the split ring provides a superior Grip that ensures the pipe cannot be pulled out, even under maximum force.**

But what really makes Agriflow the **Ultimate Universal fitting** is the fact that for 3/4" and 1" Pipe you do not need to use Conversion kits – they are truly Universal for these sizes.

WHY AGRIFLOW

- ✓ WORKING PRESSURES UP TO 16 BAR
- ✓ EXCELLENT RESISTANCE TO SLURRIES, WASTE WATER AND (UV)
- ✓ OPTIMUM GRIP RING
- ✓ EASY TO INSTALL
- ✓ WIDE RANGE
- ✓ WRAS APPROVED
- ✓ HIGH IMPACT RESISTANCE
- ✓ EASY GRIP NUT
- ✓ FULL BORE FOR FULL FLOW
- ✓ PROVEN LEAK-FREE SECURED SYSTEM

DESIGN FEATURES

Agriflow fittings are part of the **Uppercross Group** product portfolio and are manufactured on their behalf by **Elysée** who holds over 30+ International Product Certifications, including DVGW, KIWA, SII, WRAS, SAI, OVGW and SVGW and distributes to over 65+ countries worldwide.

APPLICATIONS AND STANDARDS

Our fittings are suitable for joining high and low density polyethylene pipes (PE-HD, PE-LD, PE40, PE63, PE80, PE100 conforming to: the following relevant standards:

- ✓ ISO17885
- ✓ EN 12201-3
- ✓ DIN 8076
- ✓ AS/NZS4129

CERTIFICATION

WRAS ✓

The **ULTIMATE UNIVERSAL** Fitting

OPERATING PRESSURE - 16 BAR

This video demonstrates various AgriFlow Compression Fittings using a 16 bar water pressure test showing various fittings, incl;

- Coupler
- Reducing Coupler
- Male and Female Couplers
- Tees and Elbows

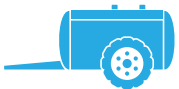

FIT FOR THE JOB

- ✓ Standard ISO17885
- ✓ Standard EN 12201-3
- ✓ WRAS Approved Product

RESISTANCE TO IMPACT

- ✓ Made from Thermoplastic materials - can be used above and below ground.

ABRASION RESISTANCE

- ✓ The fittings are suitable for the transportation of abrasive slurries and will withstand normal conditions found in urban, mining, industrial, rural water and waste water systems.

WEATHERING

- ✓ Fittings offer excellent weathering properties and are protected against degradation due to ultraviolet radiation. This makes them suitable to be used in applications such as exposed systems without additional protection.

OPERATING PRESSURE

- ✓ Suitable for working pressures up to 16 bar.

Converting Normal Gauge to Metric MDPE / Imperial (Heavy Gauge)

FITTING INSTRUCTIONS

1 Undo the nut and discard the normal gauge kit.

2 Insert the black rubber.

3 Install the small insert against the o-ring.

4 Install the grip ring with the flat piece facing down.

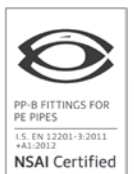

5 Screw on the nut just until it stops, do not tighten fully at this point

6 Insert the pipe until it stops.

7 Tighten with a wrench.

Solution To Connect Any Pipe – Quick Easy Install

Agriflow's **Global Transition Coupler** can join MDPE together with a variety of other pipe materials and sizes such as; copper, galvanized iron, lead, PVC, stainless steel and ABS.

The Global Transition coupler's design features a thick rubber seal designed primarily to provide a **watertight seal between fitting and inserted pipe**. The GTC fittings design accommodates the use of various material types or diameters to be joined together as required.

	Description	Size	Code	Box	Bag	Price
	GLOBAL TRANSITION COUPLER	15-22 x 20mm	A321D02220	80	10	€16.25
		15-22 x 25mm	A321D02225	80	10	€18.07
		20-27 x 25mm	A321D02725	70	10	€21.14
		20-27 x 32mm	A321D02732	60	10	€21.14
		27-34 x 25mm	A321D03425	60	10	€23.37
		27-34 x 32mm	A321D03432	55	10	€27.32

AT A GLANCE

- PROBLEM SOLVER
- WILL CONNECT ANY TYPE OF PIPE
- IDEAL FOR RETROFIT PROJECT PIPEWORK
- GET BACK TO POLYETHYLENE PIPE TO FINISH INSTALLS
- SUITABLE FOR POTABLE WATER SYSTEMS
